## How to Play

Take turns playing in a clockwise direction. Who has the most colorful clothes on today? They may go first.

Roll the die and place **one** cloud crystal in each cloud opening matching the rolled color.

★ If you roll a star you may pick any of the five colors.

Then decide on one of the three rainbows.

Place one end of the rainbow in the cloud opening where your Rainbow Friend is and try to reach another cloud opening with the other end (hopefully one with as many cloud crystals as possible).

You can temporarily place your Rainbow Friend next to the cloud opening so that there is enough space for the rainbow.

## Now check:

- **Do the support feet of the rainbow fit completely in the two cloud openings?**

**Fantastic!** Your Rainbow Friend may fly over the rainbow to the new cloud opening and collect all the cloud crystals that are there. Place them into the holes in your small treasure cloud.

Place your Rainbow Friend in the new cloud opening and put the rainbow you used back with the others.

- **Do the support feet of the rainbow not fit completely in the two cloud openings?**

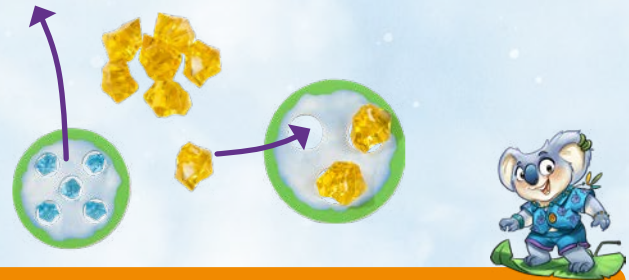

**What a pity!** Unfortunately, you don't get anything this round and your Rainbow Friend stays in the cloud opening where it is. Put the rainbow you used back with the others.

This ends your turn and now it's the next player's turn.

## Swap Crystals:

As soon as you have filled all five holes in your small treasure cloud, you can swap five sky-blue cloud crystals for one golden one. Golden cloud crystals are always placed on the larger treasure cloud with only three holes. If you still have some sky-blue cloud crystals left over after the swap, these stay on the small treasure cloud.

## End of the Game

The first player to collect three golden cloud crystals on their large treasure cloud wins the game!

## Variant for advanced rainbow sliders:

When it's your turn, decide on a specific cloud opening and announce it to the other players. Only after do you select a rainbow and place one end in the cloud opening with your Rainbow Friend. If you cannot reach the cloud opening you wanted with the rainbow you selected, then you do not get anything this round.

*Dear Children and Parents, after a fun round, did you suddenly discover that a part of this HABA game is missing and nowhere to be found? No problem! At [www.haba.de/Ersatzteile](http://www.haba.de/Ersatzteile) you can find out whether this part is still available for delivery.*

It's  
playtime!
