

Friendship necklace with shrink plastic pendant

Create your own friendship necklace with a shrink plastic pendant. Colour the shrink plastic sheets with coloured pencils and shrink the designs in the oven.

Inspiration: 16798

1

Draw designs onto the shrink plastic sheets – remember that they must be on the rough side of the shrink plastic sheets.

2

Colour the designs with coloured pencils on the rough side of the shrink plastic sheet.

3

Cut a hole in the pendants with a hole punch – remember that the hole must be large enough for the cord because it will shrink in the oven. Use the second largest hole size on the hole punch.

4

Shrink the designs in the oven. See the package for instructions.

5

Add the round jump rings to the pendants and attach them to the bracelet.

6

Divide the chain into two sections.

7

Attach the lock to the chain. Press the last ball into the slot on the lock. If necessary, open the lock slightly and press it together again.

8

Attach the pendant to the chain and squeeze the round jump ring together.
