

## Bracelet with rocaille seed beads and shrink plastic charm

Create your own bracelet with a colourful mix of rocaille seed beads and shrink plastic charms. String the beads onto an elastic cord and add the charms with the gold-plated round jump rings.

**Inspiration: 16800**

**1**

Draw designs on the shrink plastic sheets – remember to draw them on the rough side of the shrink plastic sheets.

**2**

Colour the designs with coloured pencils on the rough side of the shrink plastic sheet.

**3**

Cut a hole in the pendants with a hole punch – remember that the hole must be large enough for the cord because it will shrink in the oven. Use the second largest hole size on the hole punch.

**4**

Shrink the designs in the oven. See the package for instructions.

**5**

If you make a bracelet with a name tag, tie two pieces of elastic in the holes and attach the beads.

**6**

Tie the bracelet together with double knots.

## 7

Add the round jump rings to the charms and then add them to the bracelet.
